**Dr. Maria Franceschini Inducted into Medical and Biological Engineering Elite**

WASHINGTON, D.C.— The American Institute for Medical and Biological Engineering (AIMBE) has announced the induction of Maria Angela Franceschini, Ph.D., Associate Professor of Radiology, Radiology Martinos Center for Biomedical Imaging, Harvard Medical School and Massachusetts General Hospital to its College of Fellows. Dr. Franceschini was nominated, reviewed, and elected by peers and members of the College of Fellows for outstanding contributions in biomedical optics, particularly the development and application of near infrared spectroscopy methods for measuring the brain.

Election to the AIMBE College of Fellows is among the highest professional distinctions accorded to a medical and biological engineer. The College of Fellows is comprised of the top two percent of medical and biological engineers. College membership honors those who have made outstanding contributions to "engineering and medicine research, practice, or education" and to "the pioneering of new and developing fields of technology, making major advancements in traditional fields of medical and biological engineering, or developing/implementing innovative approaches to bioengineering education."

A formal induction ceremony was held during the AIMBE Annual Meeting at the National Academy of Sciences in Washington, DC on April 9, 2018. Dr. Franceschini was inducted along with 156 colleagues who make up the AIMBE College of Fellows Class of 2018.

**About AIMBE**

AIMBE is the authoritative voice and advocate for the value of medical and biological engineering to society. AIMBE's mission is to recognize excellence, advance the public understanding, and accelerate medical and biological innovation. No other organization can bring together academic, industry, government, and scientific societies to form a highly influential community advancing medical and biological engineering. AIMBE's mission drives advocacy initiatives into action on Capitol Hill and beyond.
