Dr. Alison Marsden Inducted into Medical and Biological Engineering Elite

WASHINGTON, D.C.— The American Institute for Medical and Biological Engineering (AIMBE) has announced the induction of Alison L. Marsden, Ph.D., Associate Professor of Pediatrics and Bioengineering, and by courtesy of Mechanical Engineering, Department of Pediatrics (Cardiology) and Bioengineering Institute for Computational and Mathematical Engineering, Stanford University to its College of Fellows. Dr. Marsden was nominated, reviewed, and elected by peers and members of the College of Fellows for fundamental contributions to cardiovascular simulation methodology, clinical translation of novel surgical designs, leadership in open-source software and gender diversity.

Election to the AIMBE College of Fellows is among the highest professional distinctions accorded to a medical and biological engineer. The College of Fellows is comprised of the top two percent of medical and biological engineers. College membership honors those who have made outstanding contributions to "engineering and medicine research, practice, or education" and to "the pioneering of new and developing fields of technology, making major advancements in traditional fields of medical and biological engineering, or developing/implementing innovative approaches to bioengineering education."

A formal induction ceremony was held during the AIMBE Annual Meeting at the National Academy of Sciences in Washington, DC on April 9, 2018. Dr. Marsden was inducted along with 156 colleagues who make up the AIMBE College of Fellows Class of 2018.

About AIMBE

AIMBE is the authoritative voice and advocate for the value of medical and biological engineering to society. AIMBE's mission is to recognize excellence, advance the public understanding, and accelerate medical and biological innovation. No other organization can bring together academic, industry, government, and scientific societies to form a highly influential community advancing medical and biological engineering. AIMBE's mission drives advocacy initiatives into action on Capitol Hill and beyond.
