

# NATIONAL INSTITUTES OF HEALTH

*Investments in NIH support the work of researchers across the country whose discoveries and innovations save lives and improve the health and well-being of all Americans.*

## Jobs and Economy

Over the last decade, NIH has driven \$822 billion for the U.S. economy and 3.7 million American jobs.

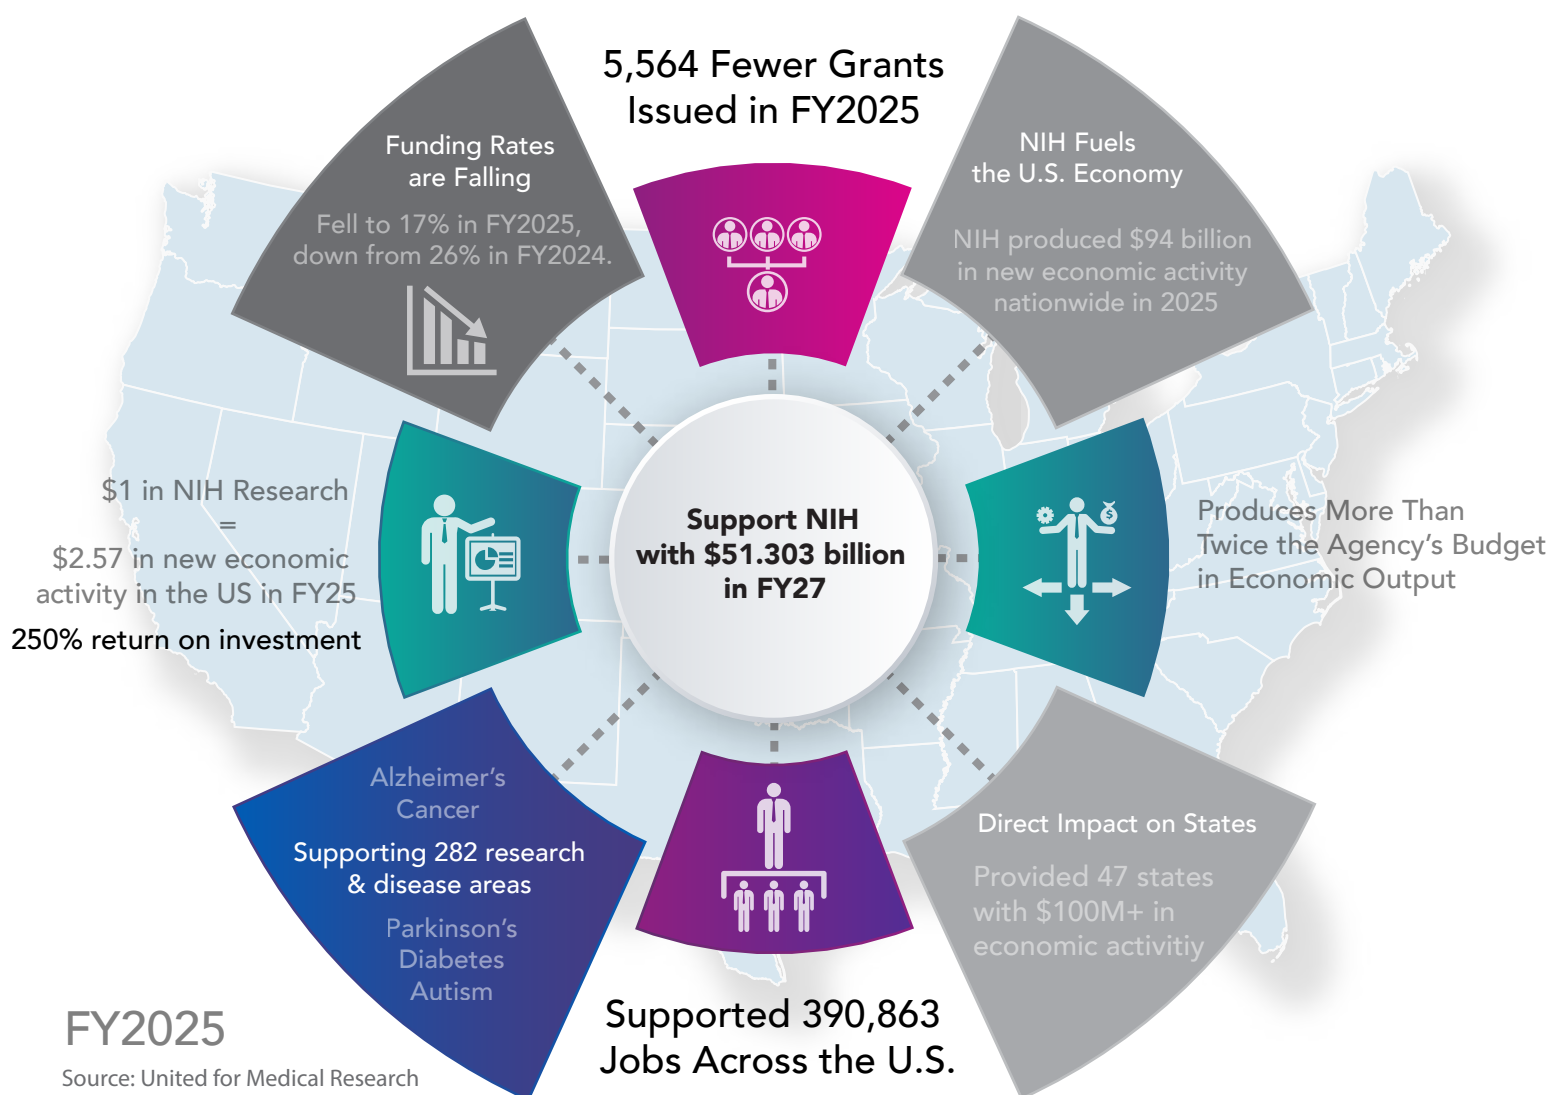

## Finding Cures

NIH supports life-saving research across 282 disease areas including Alzheimers, Cancer, and Diabetes.

## Innovative Research

NIH supports innovative research approaches including Non-Animal Models, AI, and small business grants.

The American Institute for Medical and Biological Engineering (AIMBE) is a nonprofit 501c3 organization headquartered in Washington, D.C., representing the most accomplished individuals in the fields of medical and biological engineering. AIMBE's mission is to provide leadership and advocacy in medical and biological engineering for the benefit of society.
